## Technologies and Services

### Technologies

We specialize in a number of leading web technologies and tools:

### Services

We take pride in being one of the best IT companies in India in terms of range and quality of services

#### Web Design

We will research and create the perfect web design that fits the requirements and theme of your business. Do let us know your design idea and we will only be too happy to deliver a unique website design to you.

## Theme development & integration

We create unique themes and plugins to suffice the functionality and design needs of all kinds of websites in every industry. Our theme development services include WordPress themes, eCommerce themes, blog themes, professional themes and more.

## eCommerce development

We will help you realize your dream of a feature-rich online shopping platform with online payment, cart integration and many other functionalities. We develop in all the leading eCommerce platforms including WooCommerce, Shopify, Magento, OpenCart and more.

## Website Development

Strengthen the online presence of your business with our wide range of web development service solutions and technologies backed by effective SEO optimization. Our expert web developers having years of experience in this field can help you create any website you want.

## Digital Marketing Services

When it comes to promoting your business or website online, we will leave no stone unturned. We do everything, including social media promotion, website optimization, ad placement, content marketing, email campaigns and a lot more to make sure that your website gets the traffic that converts.

## Blockchain Development Services

SAG IPL offers high-quality and cost-effective blockchain development services through a centralized cryptocurrency transactions process. We expertise in the development of blockchain based distribution apps, for mobile and desktop devices. We can help you realize the potential of the blockchain technology for creating unique, powerful and highly secure solutions to fit your specific requirements. Get in touch with our project manager to discuss your idea.

## Service Features

These are the things that make us unique and better than others in the industry:

- **Affordable Pricing :**

We are committed to providing the highest quality services at the best possible prices.

- **Strategic Planning :**

Instead of using the same plan for every project, we prefer to create and follow a unique strategy for each of our projects depending on their specific requirements.

- **Flexibility in Options :**

Our clients are given the choice to conduct interviews and choose their favorite talent for a project from our large pool of IT experts.

- **Easy Hiring Process :**

Hiring an expert with us is as easy as making a search on Google. Just select your favorite developer/marketer and proceed to hire.

- **Effective Communication :**

Our expert team of customer care executives is always there to provide you with timely solutions for all your queries

- **Technology Expertise :**

We emphasize on keeping ourself and our development process updated with the latest technologies.

## Development Process

### Meeting

We meet with the client to discuss and understand their idea and to research the ways to make it better.

### Planning

Based on the client requirements and our research we create a draft plan for the project.

### Design

The final design is created by our expert team of designers with the use of smart design tools such as Canva.

### Development

Our professional programmers write a strong and robust code to back the functionality of the design created in the last step.

### Testing

This is the most important phase of the process where we test every component of the app/website in real environments.

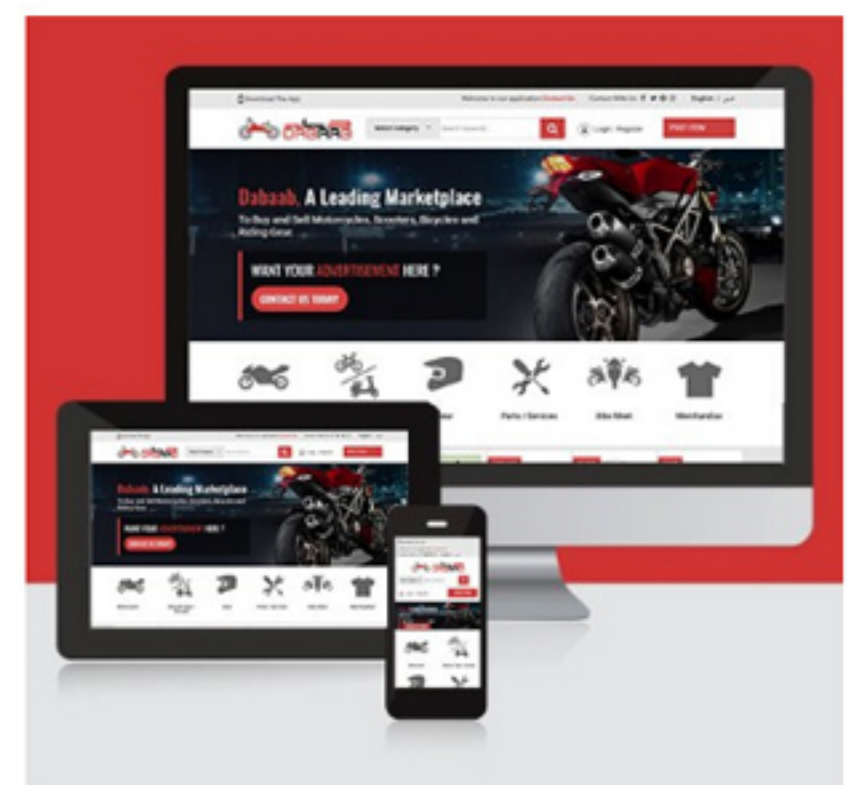

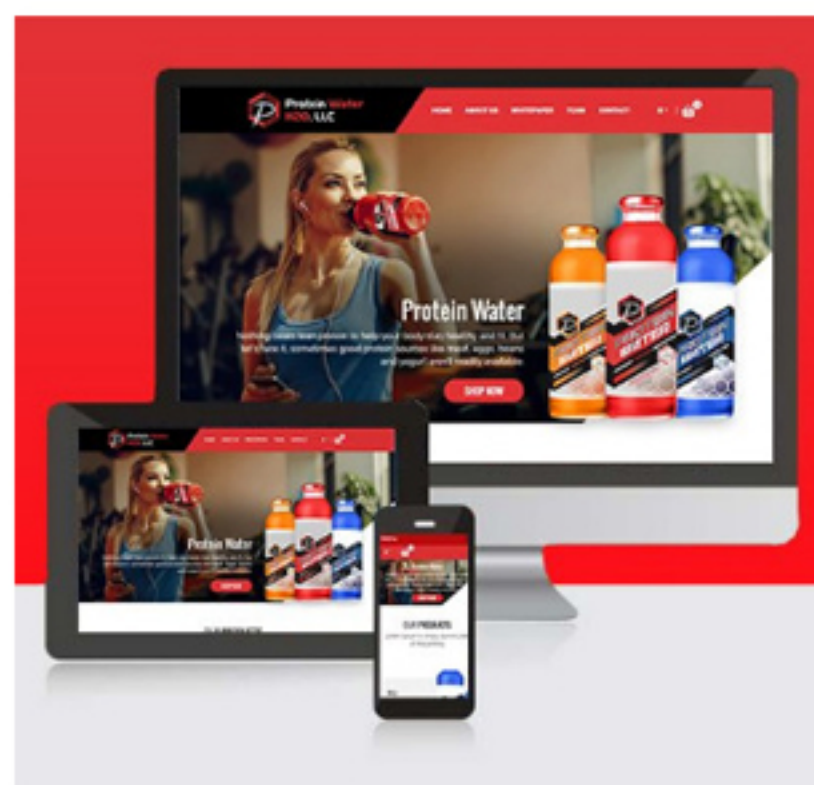

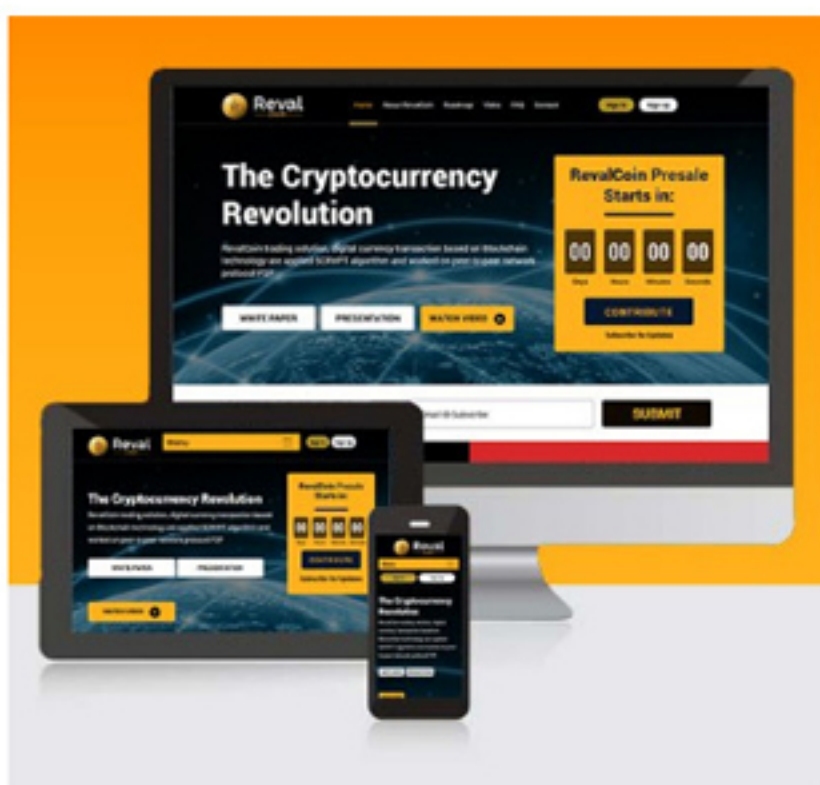

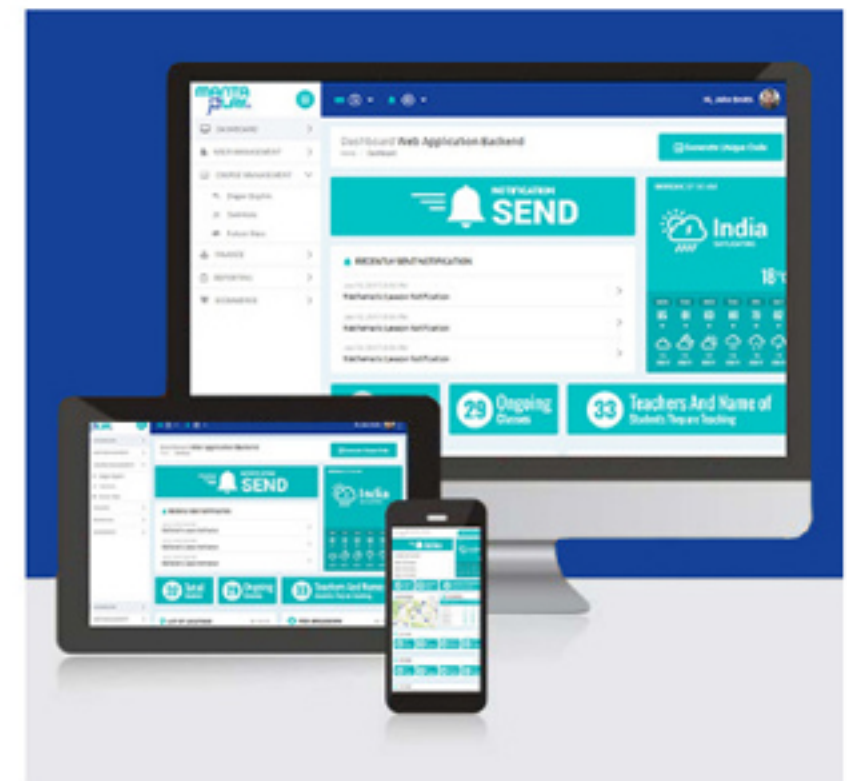

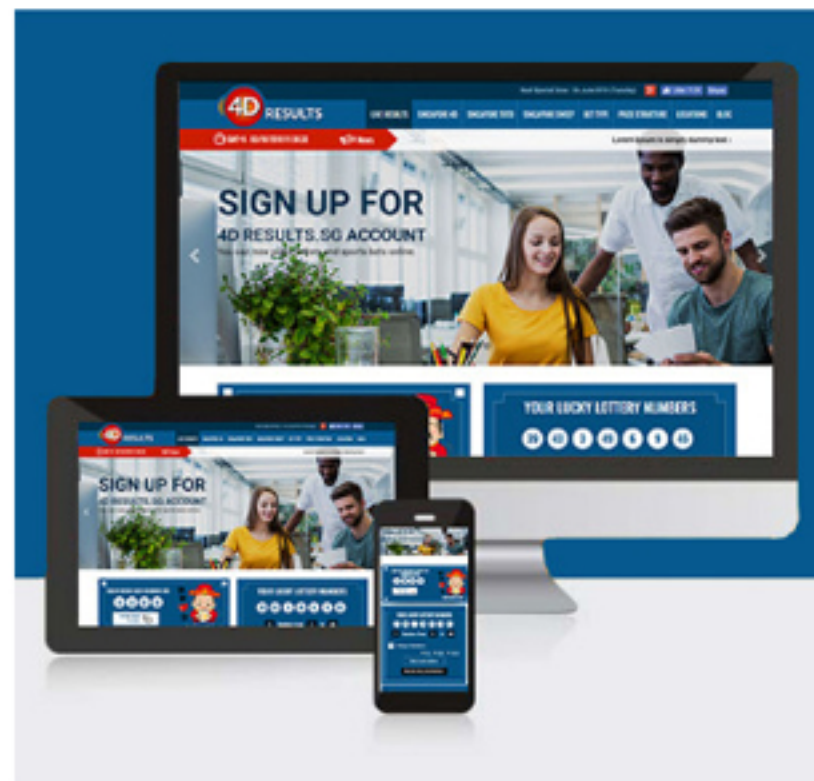

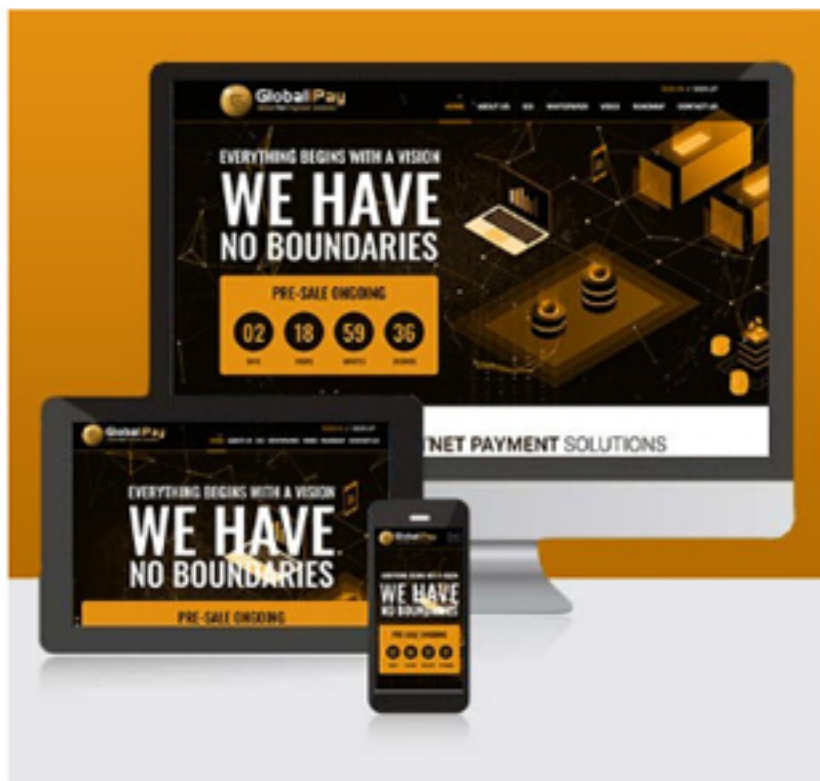

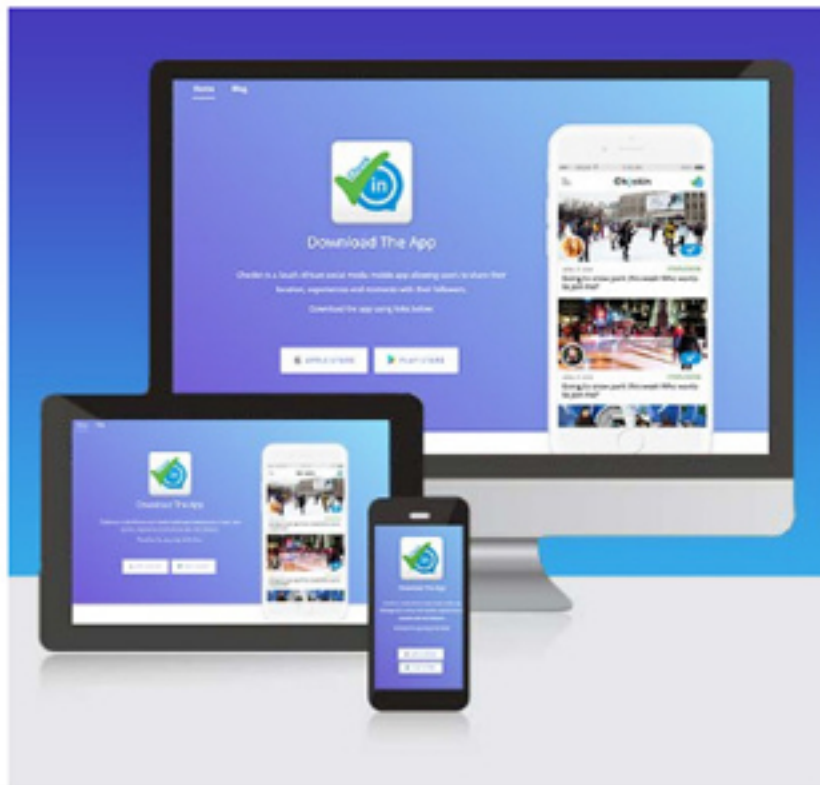

### Delivery

The finished product, along with admin details and rights, is delivered to the client over a secure online medium.
